DETAILED ACTION

Notice to Applicant

1. This communication is in response to the amendments filed 25 August 2009 and 1 June 2009. Claims 34-37, 42-43, 45-47, 49-50, 52 have been amended. Claims 1-33, 44 have been canceled. Claims 34-43, 45-54 remain pending.

Claim Rejections - 35 USC § 101

2. The rejection of claims 34-53 under 35 U.S.C. 101 is hereby withdrawn due to the amendment filed 1 June 2009.

Claim Rejections - 35 USC § 112

3. The rejection of claim 43 under 35 U.S.C. 112, first paragraph, as containing new matter is hereby withdrawn due to the amendment filed 1 June 2009.

4. The rejection of claim 44 under 35 U.S.C. 112, second paragraph, as being indefinite is hereby withdrawn due to the amendment filed 1 June 2009.

Allowable Subject Matter

5. Claims 34-43, 45-54 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 34-43, 45-54 are directed to a computerized method for managing a medical practice in which a database of insurance rules are stored in a computer database at a medical practice management server, each insurer having its own set of rules, and an insurance claim is submitted by a client computer, the claim being associated with an insurer server computer. Errors in the submitted claim are automatically corrected by the medical practice management server before processing the claim submission, by applying rules associated with the insurer server, and the computer automatically associates a first claim status with the completed claim submission indicative of the claim not satisfying one of the one or more rules. Information is transmitted to the client computer, including a claim edit screen section for editing the completed claim submission and an explanation part to explain errors in the claim submission, and the client computer sends an updated completed claim submission to the server. The medical practice management server receives the updated claim from the medical practice client and automatically corrects the claim submission based on the completed claim submission, and automatically associates a second claim status with the completed submission that indicates the submission satisfies the rules.

The closest prior art of record, Wiggins, U.S. Patent Number 7, 016, 856, discloses a database of insurance rules stored in a computer database, each insurer having its own set of rules, and an insurance claim submitted by a client computer, the claim being associated with an insurer server computer, and errors in the submitted claim being automatically corrected by a computer before processing the claim submission by applying rules associated with the insurer server and transmitting information to the client computer, which sends an updated completed claim submission to the server, however does not disclose or fairly suggest the computer

automatically associating a first claim status with the completed claim submission that indicates that the claim did not satisfy rules, transmitting a claim edit screen section for editing the completed claim to the client computer, the management server receiving the updated claim from the client and automatically correcting the claim submission based on the completed claim submission, and automatically associating a second claim status with the completed submission that indicates that the submission satisfies the rules.

6. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."
